**MADE USING DRAIN
CLEANER, BATTERY
ACID OR EVEN HAIR
BLEACH. THEN POPPED
IN YOUR MOUTH.**

ECSTASY. FACE FACTS.

Obviously there is no official 'quality control' over the manufacture of ecstasy. Each batch is different, and can be made using different chemicals - depending on what's available at the time. This means that the drug effects and toxicity of each batch will vary and be unpredictable - making overdose a possibility with each and every pill.
